ESTIMATION OF FABRIC BARRIER PROPERTIES TO PESTICIDE RESIDUES

AVA RANI PHUKAN, SWAPNA CHOUDHURY & R. PHUKAN

Department of Textiles & Apparel Designing, College of Home Science AAU, Jorhat, Assam, India

ABSTRACT

Protective clothing is an important line of defence for workers in hazardous occupations. Even though workers generally recognize the need for protective clothing they often experience problems with the size, design, and function of the clothing as well as experiencing discomfort. Wearing protective clothing and equipment when handling or applying pesticides can reduce the risk of exposure of harmful aspects of pesticide application.
