### **ABSTRACT**

*The concept of “Homosexuality” is not novel and has existed for a very long time. The article begins by highlighting the history of “Homosexuality,” which does not start in the United States but began with the Greeks. There were depictions of “Homosexuality in various art forms by the Greeks. This was followed by the emergence of various statutes and eventually writing supporting “Homosexuality.” It was when many artists such as Charles Demuth and Greek philosophers like Plato became open about their views on different gender orientations.*

*After this, the article involves the initiatives which paved the way for the acceptance of the LGBTQ community. It includes various Associations formed in support of the LGBTQ community and the efforts undertaken to promote “equality for marriage.” Numerous challenges counter every major initiative. Therefore, the article then mentions the challenges faced by the LGBTQ community in the form of various bills passed against them. The bills presented multiple limitations for the LGBTQ community, which have been mentioned briefly.*

**KEYWORDS:** *Homosexuality, LGBTQ Community, Gender Identity, Sexual Orientation, Transgender, Gender Dysphoria, Gender- Reassignment Surgery, Non- Binary, World Health Organization, Hypermasculine, United States, TGJIP Project, Disorder, International Olympic Committee, Anti- LGBTQ Bills*
